25X1

1. Work on the construction of a new bridge to replace the existing one over the Vltava River at Ceske Budejovice, which is considered inadequate, started in August 1952. The concrete pillars which will carry the new bridge have been partially completed.
2. About 70 or 80 workers are employed on this project, and on both sides of the river there are large stocks of material, chiefly cement and steel wire.
3. The new bridge will be of reinforced concrete construction. It is to be strong enough to carry the heaviest vehicles. It is unlikely that this bridge will be opened before spring 1954. It is then intended to dismantle the old bridge.
4. The new bridge will connect the main road to Linz¹ with the road leading to Stalinuv Dum (sic).

1. Comment.

it is not clear whether the city of Linz in Austria or Linec, a suburb of Ceske Budejovice, is meant. In Czech, both place names are spelled the same.
